

UNI – CHOCK Efficient Pipe Chock

Enhance ease of use and reduce cost with an optimized pipe chock.

ADVANTAGES & BENEFITS:

- Fully engineered pipe chock with lower costs.
- Used for up to 16" tubulars.
- Six different nail locations for increased flexibility.
- 5-in Pipe Chock Equivalent.
- 400 / box.
- 2 nails provided / chock.
- Duplex Nails for ease of removal.
- HDPE construction ensures impact resistance and reliability under harsh conditions.
- 100% Recyclable.

Uniarmour has re-engineered the pipe chock to enhance ease of use and reduce cost. Our UNI – CHOCK are weight-optimized in order to provide the lightest pipe chock on the market while maintaining the load bearing capacity.

In addition to being designed to withstand extreme temperature and impact environments, UNI – CHOCK is fitted with six different nail hole locations for enhanced ease of use, especially in limited spaces. The provided duplex nails offer ease of removal while providing high contact forces.

UNI – CHOCK is constructed of high-density polyethylene thereby offering optimal impact resistance while reducing costs. This product is fully recyclable.
